**THE BLACK SPHERE, LLC
SUPPORTS THE SPENDING REDUCTION ACT**

For far too long, the Federal government has run unrestrained with respect to spending. Budgets are arbitrarily increased year after year, with very little oversight. This is why The Black Sphere organization supports the Spending Reduction Act (H.R. 408) that is being introduced. Kevin Jackson, President of The Black Sphere says, "This is a necessary and vital first step. The next steps are for Congress and the Executive Office to govern according to the Constitution, and to cut the size of government. Our fiscal lives depend on it."

The Republican-controlled House appears to be listening to the grass roots, and they should know that The Black Sphere organization will support measures that are in accordance with American ideals of fiscal restraint and responsibility. Spending reduction will help the government streamline, and put the private sector back to work. The creation of new private sector jobs will provide a much needed boost to employment in minority communities, as well as the poor.
